PROFESSIONAL SUMMARY

Full Stack Software Developer focused on Python-based backend engineering, AI-integrated systems, and scalable web applications. Skilled in FastAPI, Django, PostgreSQL, REST APIs, WebSockets, and system integrations, with hands-on experience building ERP solutions, real-time applications, and agentic AI systems.

TECHNICAL SKILLS

- **Languages**
Python, JavaScript, SQL, HTML5, CSS3
- **Backend**
FastAPI, Django, REST APIs, WebSockets, Odoo
- **AI Systems**
LLM Integration, RAG, ChromaDB, Whisper, Ollama
- **Databases**
PostgreSQL, SQLite, ChromaDB
- **DevOps & Tools**
Docker, Git, Linux, VS Code, Render, Cloudinary

WORK EXPERIENCE

Odoo Developer (ERP & Backend) — Internship / Industry Project. Jul-2025 – Jan-2026

- Designed and customised Odoo modules using Python, XML, and PostgreSQL to implement ERP business workflows and backend logic.
- Developed server-side controllers and automation features, reducing manual operational steps through workflow automation.
- Integrated Shopify REST APIs enabling automated synchronisation of products, orders, and customer data.
- Built automated email and WhatsApp messaging workflows improving communication efficiency.
- Optimised database models and backend processes for improved maintainability and performance.

PROJECTS

VINI — Embodied Emotional AI Desktop Agent

Tech Stack: Python, FastAPI, Gemini API, Ollama, ChromaDB, SQLite, Whisper STT, Piper TTS, Electron, Canvas 2D, WebSocket

GitHub: <https://github.com/priyaanshkurmi/vini>

- Architected a modular 6-layer AI desktop agent with memory, emotion modelling, voice pipeline, avatar rendering, and safe tool execution.
- Built pluggable LLM abstraction supporting Gemini and Ollama using Adapter pattern architecture.
- Implemented semantic RAG memory using ChromaDB and long-term persistence using SQLite.
- Developed real-time avatar communication via WebSockets with expressive animation states and lip sync.
- Designed secure tool execution system with whitelisted commands, confirmation flow, and audit logging.

E-Commerce Web Application

Tech Stack: Python, Django, HTML, CSS, PostgreSQL, Razorpay API

Render-Deployment: <https://e-commerce-spes.onrender.com>

- Developed a full-stack e-commerce platform with authentication, product catalogue, cart system, and complete order lifecycle management.
- Integrated Razorpay payment gateway enabling secure online transactions with invoice generation and automated email notifications.
- Designed scalable backend using Django MVC architecture and ORM, simulating a real production workflow including payments, order tracking, and user management.

Odoo ERP System

Tech Stack: Python, Odoo, PostgreSQL, XML

GitHub: https://github.com/priyaanshkurmi/odoo_erp_work

- Developed custom ERP modules handling business workflows and backend automation.
- Implemented API integrations and automated messaging via email and WhatsApp services.
- Designed relational database models improving operational data management.

Personal Portfolio Website

Tech Stack: HTML, CSS, JavaScript, Django

GitHub-Deployment: <https://priyaanshkurmi.github.io/priyansh-portfolio/>

- Built a responsive developer portfolio with structured frontend design.
- Implemented reusable components and responsive layouts with Git-based deployment workflow.

EDUCATION

Bachelor of Computer Applications (BCA) 2023 – 2026

PM Excellence, Govt. Hamidia College, Barkatullah University, Bhopal

CERTIFICATIONS

Python Programming Certification — Hamidia College, Bhopal (2025)

LANGUAGES

English — Fluent **Hindi** — Fluent
